**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of species "a" (Figures 1A-2B) in the reply filed on 10 October 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 18, 19, 23, 24, 27-46, 49 and 50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10 October 2005.

3. Upon reconsideration, it is noted that the remaining claims are further restrictable. It is regretted that the applicability of this restriction to the claims was not earlier realized.

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-22, 25 and 26, drawn to a device, classified in class 40, subclass 625+.

II. Claims 47, 48 and 50, drawn to a method of playing a game, classified in class 273, subclass 459.

III. Claim 51, drawn to a method of selling a device,  
classified in class 434, subclass 107.

The inventions are distinct, each from the other because of the following reasons:

5. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the device can be used as a bracelet.

6. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, as similarly set forth above, the device can be used as a bracelet.

7. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 3711

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions (playing a game and selling an article) are considered to be clearly two different modes of operation.

8. Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification, and the search required for any one Group is not required for any other Group, and the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
